EDUCATION

The University of North Carolina at Charlotte; Charlotte, NC

August 2025

Bachelor of Science in Computer Science

GPA: 3.29/4

Concentration: AI, Robotics, and Gaming

Honors: Chancellor's List: Fall 2025

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Front-End Web Development, Intro to Artificial Intelligence, Introduction to Computer Systems

TECHNICAL SKILLS:

Programming Languages and Databases: Python, JavaScript, Bash, PostgreSQL, MongoDB, C

Tools and Technologies: React.js, Electron.js, Recharts, Node.js, Git, GitHub

WORK EXPERIENCE:

University of North Carolina at Charlotte

March 2026 - May 2026

Teaching Assistant, Charlotte, NC

- Introduced a continuous autosave feature to WebWork's grading system, preventing in-progress data loss when grading assignments.
- Created study guide materials for Discrete Mathematics. Clarified concepts in functions and logic to support exam prep.

University of North Carolina at Charlotte

May 2026 - Current

Client Support Technician, Charlotte, NC

- Provided technical support to University staff, troubleshooting hardware and software issues.
 - Assisted in managing hardware for the University. Handled surplus inventory and hardware exchange.
-

COURSE & PERSONAL PROJECTS:

Sudoku Game Build + AI Solving Algorithm

April 2026 - May 2026

- Designed and deployed a polished Sudoku game build, utilizing Tailwind CSS, Next.js, and React.js. Implemented instant autosave at every keystroke, allowing users to come back later.
- Developed a backtracking algorithm that solved Sudoku puzzles autonomously. Designed a system of Sudoku game generation to create a looping visual of Sudoku puzzles being slowly solved by AI.

Neural Encoding Desktop App

March 2026 - April 2026

- Designed a desktop application that displays a stream of captured brain activity in a modern design. Transformed the prior application from just a button to a full fledge interface.
- Lead the Front-End team, personally implemented Electron to the codebase which made the application a desktop and cross-platform application. Personally implemented data visualization using a dynamic SVG.
- Designed data flow to allow data streaming consistently when navigating through different parts of the UI.

PhotoShare Web App

January 2026 - April 2026

- Personally implemented comment sharing functionality on a full-stack social media application. Worked in a team using Agile workflow, React, Node.js, Express, and MongoDB. Assured route-awareness throughout the UI.
 - Implemented login functionality from scratch. Designing the front-end graphics and ".post" backend APIs to send and verify account information.
-

STUDENT INVOLVEMENT

Charlotte AI Research Club, Charlotte, NC

March 2026 - April 2026

Front-End Developer

- Lead Front-End development for a real time EEG data visualization application.
- Implemented rendering of dynamic SVGs to represent live EEG data.
