U.S. Citizen in Charlotte, North Carolina

Education

- B.S in Computer Science at UNC Charlotte Expected – December 2027

Experience

Teaching Assistant at UNC Charlotte

March 2026 - May 2026

- Developed an extension for our grading system using JavaScript, HTML and CSS to prevent data loss and improve the user interface.

Projects

Developer, PhotoShare Web App

- Shipped new features to a social media application using TypeScript, React, Next.js JavaScript, HTML, and CSS, allowing users to leave comments and upload photos.
- Collaborated with a five-member team in weekly meetings to plan Agile sprints and exchange constructive feedback on feature implementations.
- Deployed RESTful APIs using Node.js and AWS to authenticate users, upload images, and retrieve media from cloud storage.
- Designed object-oriented data models in JavaScript with MongoDB. Making sure that any data being sent to the server fits the desired structure.
- Handled version control and CI/CD with Git. Assigned tasks with GitHub projects, allowing each team member to focus on one portion of the feature and automating updates.

Solo Developer, Sudoku Game Build + AI Solver

- Developed a Sudoku web game using TypeScript, React, Next.js, JavaScript, and HTML. Allowing users to play Sudoku online.
- Deployed with AWS, enabling CI/CD and automating the process of pushing future updates.
- Called APIs to handle user registration and used PostgreSQL to store user data. Displayed data as a leaderboard of players who have solved the most puzzles.
- Implemented an AI solve feature using Python, JavaScript, HTML and CSS. Used feature to aid in development, and to create a visual of puzzles being solved autonomously.
