U.S. Citizen in Charlotte, North Carolina

Education

- B.S in Computer Science at UNC Charlotte Expected – December 2027

Experience

Teaching Assistant at UNC Charlotte

March 2026 - May 2026

- Developed an autosave extension for WebWork's grading system using JavaScript, HTML and CSS. Preventing data loss when refreshing the page.
- Fixed UI bugs in WebWork's grading system using JavaScript, HTML, and CSS, allowing dropdowns to fully display options, and providing a better view of the comment section.
- Created study guide materials and graded exams using guidelines from senior staff.

Projects

Solo Developer, Sudoku Game Build + AI Solver

- Developed a Sudoku web game using React, Next.js, JavaScript, and HTML. Allowing users to play Sudoku online.
- Called APIs to handle user registration and used PostgreSQL to store user data. Used JavaScript to display data as a leaderboard of players who have solved the most puzzles.
- Implemented an AI solve feature using Python, JavaScript, HTML and CSS, creating a visual of puzzles being solved autonomously. Also allowing for easier debugging and development.

Developer, PhotoShare Web App

- Managed team workflow as Scrum Master. Divided and assigned tasks using GitHub Projects so that every team member could focus on one portion of the feature.
- Deployed RESTful APIs across multiple features using Express, Node.js, and JavaScript. Allowing users to send login credentials and retrieve media from the server.
- Designed object-oriented data models in JavaScript with MongoDB. Making sure that any data being sent to the server fits the desired structure.
- Implemented comment sharing functionality using JavaScript, MongoDB, and React. Creating the ability for users to leave comments on uploaded photos.
- Designed UI components using CSS and HTML, adding style to the login and register pages.
