EDUCATION

The University of North Carolina at Charlotte; Charlotte, NC

August 2025

Bachelor of Science in Computer Science

GPA: 3.29/4

Concentration: AI, Robotics, and Gaming

Chancellor's List: Fall 2025, Spring 2026

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Front-End Web Development, Intro to Artificial Intelligence, Introduction to Computer Systems

TECHNICAL SKILLS:

Programming Languages and Databases: Python, JavaScript, HTML, CSS, Bash, PostgreSQL, MongoDB, C

Tools and Technologies: React.js, Electron.js, Recharts, Node.js, Git, GitHub

WORK EXPERIENCE:

University of North Carolina at Charlotte

May 2026 - Current

Client Support Technician, Charlotte, NC

- Managed the full system lifecycle for campus technology, handling OS imaging and preparation to ensure stability through 70+ devices using **Microsoft Configuration Manager** and **Active Directory**.
- Debugged software deployment and network authentication issues using **Bash** commands and enterprise tools.

University of North Carolina at Charlotte

March 2026 - May 2026

Teaching Assistant (Logic and Algorithms), Charlotte, NC

- Developed a continuous autosave extension for WebWork's grading system using **JavaScript**, preventing in-progress data loss when grading assignments.
 - Supervised the learning of 75 students in critical computer science concepts such as algorithm design, recursion, and binary notation. Graded tests, assignments, and hosted office hours for tutoring.
-

COURSE & PERSONAL PROJECTS:

Instagram Metrics (Solo Developer)

September 2025 - December 2025

- Developed a statistical analysis application from end to end using **React.js** and **Electron.js**. Published via desktop installer with auto-update capabilities using **Electron-Updater**.
- Analyzed exported datasets to identify non-followers and visualized findings using **Recharts**.

PhotoShare Web App

January 2026 - April 2026

- Managed team workflow as **Scrum Master** for a 5-man team. Coordinated sprint planning using **GitHub Projects** and ensured adherence to Agile methodologies.
- Implemented comment sharing functionality on a full-stack social media application using **React**. Expanded **MongoDB** schemas, built APIs in **Node.js**, and designed corresponding UI components.
- Deployed login functionality from scratch. Designed the login/register form using **Material UI (MUI)** components.

Sudoku Game Build + AI Solving Algorithm

April 2026 - May 2026

- Designed and **deployed** a polished Sudoku game build, utilizing **Tailwind CSS**, **Next.js**, and **React.js**. Implemented instant autosave at every keystroke, allowing users to come back later.
- Developed a backtracking algorithm in **Python** that solved Sudoku puzzles autonomously. Designed a system of Sudoku game generation to create a looping visual of Sudoku puzzles being slowly solved by AI.

Neural Encoding Desktop App

March 2026 - April 2026

- Designed a desktop application that displays a stream of captured brain activity in a modern design using **React.js**, and **FastAPI** backend. Transformed the prior application from a button to a full fledge interface.
- Led the Front-End team, implementing **Electron.js** for desktop native features such as file access and packaging. Personally implemented data visualization in **JavaScript** through dynamic SVG rendering.
